

**Old Saybrook High School
Mathematics Department
Calculator Loan Program
2017-2018**

A graphing calculator (GC) is now required for all students in all levels of Algebra, Pre-Calculus, and Calculus. GCs are allowed on all standardized testing including PSAT/SATs. GCs are required for the AP Calculus exam.

The OSHS Math Department recommends a TI-84 Plus Silver. The TI-84 Plus C Silver is a color-screen version of this calculator and is ideal! Other suitable calculators include any TI-83, TI-84, or TI-89. Other brands of graphing calculators are also acceptable although teachers do not have much experience with these other options and cannot help with the many functions of these alternatives. GCs can be purchased at many retail stores (Staples, Walmart, ...). Check out Amazon and even eBay.

The Mathematics Department of OSHS has a limited number of GCs to loan to students with financial need. It will be the student's responsibility to maintain the calculator in acceptable working condition, including battery replacement as needed. The loaned calculator must be returned with working batteries, without excessive wear or markings. If the calculator is not returned, or returned in poor condition, the student will be billed \$115.

Please complete this form and return to your math teacher to obtain a calculator.

Part I: (to be completed by student and parent/guardian)

I understand that it is my responsibility to keep the calculator I have been loaned in acceptable condition, including battery replacement and return it in acceptable condition at the end of this math course.

Student Name (please print): _____

Student signature: _____ Date: _____

Parent/Guardian signature: _____ Date: _____

Math Course: _____ Teacher Name: _____

Part II: (to be completed by the school)

Calculator Type: _____ Calculator #: _____

Date of Loan: _____ Notes: _____

Part III: (to be completed by the school)

Date Returned: _____ Teacher Initials: _____

Condition/Financial Obligation: _____
